

1. Look up SMOTE oversampling
https://imbalanced-learn.org/stable/references/generated/imblearn.over_sampling.SMOTE.html .
 - a. Describe what it is in your own words in markdown.
 - b. Use this technique with the diabetes dataset. Comment on the model performance compared to other methods. Make sure you are clear about why you chose the performance metric you did.
2. Create a list of preprocessing steps you should try when working to build a model. Briefly describe what each step is. Work with your group to come up with the most comprehensive list you can.
